PROFESSIONAL SUMMARY

Final-year BSc Computer Science student (first-class results to date, predicted First-Class Honours, June 2027) with hands-on experience integrating APIs, automating client workflows, building an OpenAI-powered chatbot and developing Python/FastAPI backends. Comfortable working directly with clients and explaining technical work clearly, and keen to apply LLMs to messy real-world data. Seeking a Graduate Software Engineer role.

EDUCATION

BSc (Hons) Computer Science | Teesside University London *Aug 2024 – Jun 2027 (expected)*

- First-class results in both completed years; predicted First-Class Honours

EXPERIENCE

Retail Sales Associate | Timberland (part-time), Greater London *Nov 2025 – Present*

- Deliver customer service and product support, contributing to team targets and generating £119,000 in sales since November

Virtual Assistant (Freelance) | Vanray Systems, United States *Mar 2025 – Aug 2025*

- Built and maintained GoHighLevel workflows, dashboards and CRM pipelines that automated lead capture and follow-up for client sales teams, saving substantial manual time
- Built an n8n chatbot integrating the OpenAI API

Web Developer (Freelance) | SoftSphere.Co, Ontario, Canada *May 2024 – Jan 2025*

- Automated lead pipelines by linking Facebook and Google lead sources into the CRM, reaching 20–25 clients per 100 leads each week
- Worked with team members to turn design and functional requirements into front-end components, troubleshooting UI issues and improving usability
- Built responsive interfaces and client dashboards using HTML, CSS, Tailwind, JavaScript and React/TypeScript

PROJECTS

Railway POS System | Python, FastAPI, SQL *Dec 2024 – Apr 2025*

- Designed and built an API-driven railway ticketing and route-management system covering authentication, route management, bookings and payments
- Implemented separate user and manager roles with admin controls and activity logs, backed by a SQL database; code on GitHub

Internal Developer Platform (in progress) | Python, FastAPI, Docker, Terraform, Git

- Developing a FastAPI service containerised with Docker, with infrastructure defined as code in Terraform and all work version-controlled in Git

Events Organiser Web App | C#, .NET Framework *Nov 2025 – Dec 2025*

- Built a working events platform with role-based access for guests, workers and admins, event management and a bookings page

TECHNICAL SKILLS

Languages: Python, SQL, C#, JavaScript, TypeScript, HTML/CSS
Backend, APIs and Data: FastAPI, API development and integration, PostgreSQL, SQL and NoSQL databases, .NET Framework
Automation and AI: AI coding tools, OpenAI API, n8n, GoHighLevel, CRM workflow automation
DevOps and Tools: Git, GitHub, Docker, Terraform
Front-end: React, Tailwind CSS
